

LABORATORY RECORD

Course: Full Stack Web Development

Course Code: 23CM4121

Experiment No.: 1

Student Name: Gorapalli Sravya

Roll No.: A24126552257

Date:

1. TITLE

Design a Static Webpage Using HTML Components

2. AIM

To design and develop a static webpage using various HTML components in order to understand the basic structure and elements of an HTML document.

3. OBJECTIVE

The objectives of this experiment are:

- To understand the basic structure of an HTML document.
- To use HTML tags such as headings, paragraphs, lists, tables, images and hyperlinks.
- To design a well-formatted static webpage using HTML components.
- To view and verify the webpage output in a web browser.

4. THEORY

HTML (HyperText Markup Language) is the standard markup language used to create web pages. An HTML document is made up of elements represented by tags enclosed in angle brackets, such as `<html>`, `<head>`, `<body>`, `<h1>` to `<h6>`, `<p>`, `<a>`, `<img>`, `<ul>`, `<ol>`, `<li>` and `<table>`.

Every HTML document begins with a `<!DOCTYPE html>` declaration, followed by the `<html>` tag, which contains two main sections: the `<head>`, which holds metadata and the page title, and the `<body>`, which holds all the visible content of the page.

A static webpage is a webpage whose content is fixed and does not change based on user interaction or server-side processing. It is rendered by the browser exactly as written in the HTML file.

5. ALGORITHM / PROCEDURE

1. Open a text editor (e.g., VS Code).
2. Create a new file and save it with a `.html` extension.
3. Add the basic HTML boilerplate: `<!DOCTYPE html>`, `<html>`, `<head>` and `<body>`.
4. Add a page title using the `<title>` tag inside `<head>`.

5. Add headings using the <h1> to <h6> tags.
6. Add descriptive text using the <p> tag.
7. Add an unordered list using and tags.
8. Add an ordered list using and tags.
9. Add a table using <table>, <tr>, <th> and <td> tags.
10. Add a hyperlink using the <a> tag.
11. Add an image using the tag.
12. Save the file.
13. Open the file in a web browser to view the output.

6. PROGRAM

index.html

```
<!DOCTYPE html>
<html>
<head>
  <title>My Static Webpage</title>
</head>
<body>

  <h1>Welcome to My Static Webpage</h1>

  <h2>About Me</h2>
  <p>This is a simple static webpage designed using basic HTML
    components such as headings, paragraphs, lists, tables,
    images and hyperlinks.</p>

  <h2>My Hobbies</h2>
  <ul>
    <li>Reading</li>
    <li>Coding</li>
    <li>Traveling</li>
  </ul>

  <h2>My Skills</h2>
  <ol>
    <li>HTML</li>
    <li>CSS</li>
    <li>JavaScript</li>
  </ol>

  <h2>My Details</h2>
  <table border="1">
    <tr>
      <th>Field</th>
      <th>Value</th>
    </tr>
    <tr>
      <td>Name</td>
      <td>Gorapalli Sravya</td>
    </tr>
    <tr>
      <td>Course</td>
      <td>B.Tech CSE (AI & ML)</td>
    </tr>
  </table>

```

```

    </tr>
</table>

<h2>Visit My Favorite Website</h2>
<a href="https://www.google.com">Click here to visit Google</a>

<h2>My Photo</h2>

</body>
</html>

```

7. CODE EXPLANATION

Tag / Code	Explanation
<!DOCTYPE html>	Declares the document type as HTML5
<html>	Root element that contains the entire webpage
<head>	Contains metadata and the title of the page
<title>	Sets the title shown on the browser tab
<body>	Contains all the visible content of the webpage
<h1> to <h6>	Define headings of different sizes
<p>	Defines a paragraph of text
,	Defines an unordered (bulleted) list
,	Defines an ordered (numbered) list
<table>,<tr>,<th>,<td>	Defines a table with rows, headers and cells
	Defines a hyperlink to another page
	Embeds an image into the webpage

8. TEST CASES AND EXECUTION DATA

The webpage was opened in a browser and each component was verified individually. The results were recorded below.

Test Case	Description	Expected Result	Actual Result	Status
TC-01	Open index.html in a browser	Page loads with heading displayed	Page loaded with heading displayed	Pass
TC-02	Click the hyperlink	Navigates to the linked page	Navigated to the linked page	Pass
TC-03	Check image display	Image is displayed correctly	Image displayed correctly	Pass
TC-04	Check list rendering	Ordered & unordered lists display correctly	Lists displayed correctly	Pass

TC-05	Check table rendering	Table displays rows and columns correctly	Table displayed correctly	Pass
-------	-----------------------	---	---------------------------	------

9. OUTPUT

Output: Webpage Rendered in Browser

[Click to go back, hold to see history](#)

Welcome to My Static Webpage

About Me

This is a simple static webpage designed using basic HTML components such as headings, paragraphs, lists, tables, images and hyperlinks.

My Hobbies

- Reading
- Coding
- Traveling

My Skills

1. HTML
2. CSS
3. JavaScript

My Details

Field	Value
Name	Gorapalli Sravya
Course	B.Tech CSE (AI & ML)

10. RESULT

Thus, a static webpage was successfully designed and developed using various HTML components such as headings, paragraphs, lists, tables, images and hyperlinks, and the output was verified in a web browser.
